

SME Growth Copilot

AI-Powered Management Analytics & Decision Support for SMEs

Created and developed by Rithik Bhattacharjee

Executive Summary

SME Growth Copilot is a portfolio prototype that combines management analytics, KPI measurement, dashboards and AI-assisted interpretation to support SME decisions across marketing, sales, customer acquisition and revenue.

Analytical Framework

Business Data → Data Cleaning → KPI Calculation → Analytics → Dashboard → AI-Assisted Interpretation → Management Recommendations

Core Metrics

Metric	Formula
Conversion Rate	Customers / Leads
CPL	Marketing Spend / Leads
CAC	Marketing Spend / Customers
ROMI	(Revenue - Marketing Spend) / Marketing Spend
Repeat Rate	Repeat Customers / Customers

Illustrative Findings

Organic: spend █14,722, revenue █195,341, CAC █475, ROMI 12.27.

Email: spend █33,650, revenue █262,675, CAC █801, ROMI 6.81.

Meta Ads: spend █143,451, revenue █550,865, CAC █1,526, ROMI 2.84.

Limitations

The dataset is synthetic and intended for demonstration. Recommendations are decision-support outputs and should be validated against real business data before implementation.

Future Development

Revenue forecasting, budget optimization, customer lifetime value, scenario simulation, natural-language queries, automated reports and CRM/ad-platform integrations.
